Dear Parents, Guardians and Staff:

This communication serves as a follow up to the lead testing originally done throughout our district on April 14, 2017. Clearview Regional School District contracted with South Jersey Water Test, LLC of Williamstown, NJ to conduct a follow up flush sample on the outlets that were above the action level of 15.5 ug/l on April 14th. Seven (7) outlets were re-sampled. Four (4) of the seven outlets were below the actionable level on the first draw. Three (3) outlets were above the actionable level. A thirty (30) second flush sample was conducted on the three (3) outlets. All three (3) flushed outlets were below the actionable level of 15.5 ug/l.

High School			
Sample Location	First Draw result in ug/l (ppb)	30 Second Flush result in ug/l (ppb)	Remedial Action
ID # HS-PF-S-32 Kitchen Pot Filler	36	<2.00	Not in Use Disconnected outlet
Middle School			
Sample Location	First Draw result in ug/l (ppb)	Flushed Sample	Remedial Action
ID # CRMS-T17 Kitchen Pot Filler	22.7	<2.00	Not in Use Disconnected outlet
CRMS-T57 Classroom 411 Sink	39.3	<2.00	Shut Off Water to Sink

In accordance with the Department of Education regulations, no remedial measures are required for any drinking water outlet since the flushed samples were all below the action level of 15 ug/L (ppb). The school district has decided, however, to discontinue use of the above three outlets.

For more information about water quality in our schools, please contact Steve Nicolella at 856-223-2784.

For information about water quality and sampling for lead at home, contact your local water supplier or refer to the Department of Environmental Protection's website at <http://www.nj.gov/dep/watersupply/dwc-lead-schools.html>.

Sincerely,

John Horchak
Superintendent of Schools
